AI-trading and DeFi strategies **accessible** to the masses

We're here entering the era where computers will trade against computers, and humans are being pushed to the side."

Christopher Steiner, Bestselling Author of "Automate This: How Algorithms Took Over Our Markets, Our Jobs, and the World"

It's happening...

\$650 billion lost by retail investors in 2022

Lack of time & Technical knowledge

Managing crypto assets and navigating the ecosystem can be overwhelming. According to Coindesk, many investors find the crypto space increasingly complex, **making it harder to understand and leading to losses** for most, especially newcomers.

Outperformed by professionals or robots

Automated trading systems and professional traders, who leverage sophisticated strategies and tools, dominate a significant portion of market activity. This creates a **competitive disadvantage for individual investors** who rely on manual trading or less advanced tools.

Overcomplicated UI interfaces

The DeFi space, in particular, is known for its complex interfaces. While specific data on user interface complaints in DeFi is scarce, the general sentiment in the community and feedback on forums suggest that **newcomers often find DeFi platforms intimidating due to their complexity.**

Emma AI is here to give you an edge

Emma AI is capable of generating and executing portfolios tailored to user's risk appetite and market trends through an easy to use conversational interface.

Trading:

- BTC
- ETH
- LTC
- USD
- EUR
- GBP
- AUD

DeFi:

- Concentrated Liquidity
- Looping
- Delta Neutral
- Arbitrage

Chat with Emma and build a portfolio **tailored for you**

Given the current bearish market sentiment, with major cryptocurrencies experiencing a 60% drop from their peak, a portfolio with volatile assets could potentially offer higher yield in the future. Would you like me to create a DeFi-centric portfolio for you?

Can I withdraw my funds at any time?

Absolutely, you have the flexibility to withdraw anytime. However, it's important to note that a DeFi-centric portfolio may experience dips. Withdrawing during these periods might result in losses. Considering your need for liquidity, would you prefer a more balanced portfolio approach?

Yes, please.

Build your **personal portfolio** with one click

Great choice! I've put together a balanced portfolio for you, prioritizing liquidity while incorporating some strategies with volatile assets for long-term growth potential.

Investments	Projected APR	Portfolio Weight	Weighted APR

\$10.000.000.00	22,50%
\$25.000.000.00	56,25%
\$50.000.000.00	112,50%

What our community says about us

"As an investor, I value staying ahead and SafeYields DAO has been exceptional, offering hassle-free portfolio management and **consistent 30% APR returns**. Their transparency and technology clarity sets them apart in the AI-driven investment landscape."

@Gallantjohny

"As an investor, my main goal is steady passive income from SafeYields DAO, which has been predictable with low-risk return of **25% APR on average**. I appreciate transparent communication and regular hassle-free monthly payouts from the team, enhancing my investment experience."

@Aj_ct

"I'm drawn to SafeYields because it embodies every entrepreneur's dream: passive income. The idea of earning continuously, even while asleep, is captivating. The unique aspect of **generating income just by Staking a token** without the need for active involvement, is truly remarkable."

@Cryptowraith

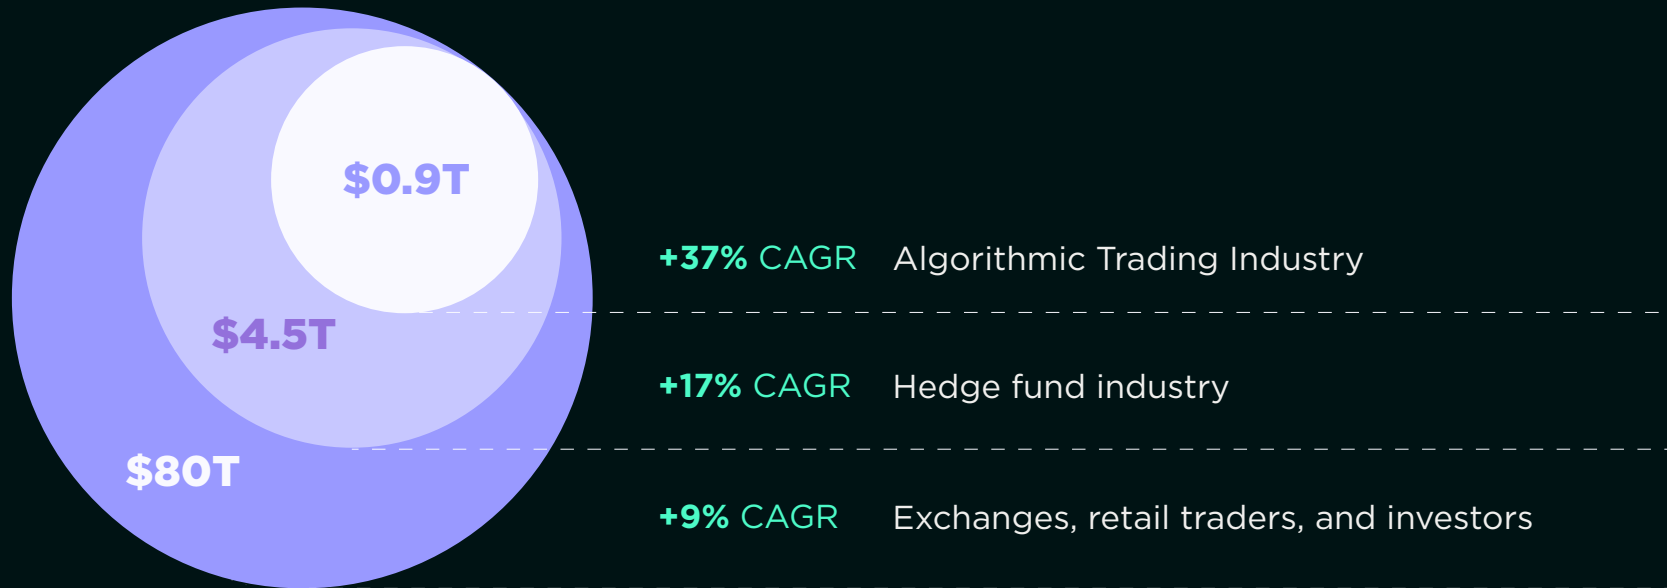

Traction with MVP in **8 months** since launch

Growing steadily

1. Raised around 80k in AUM organically with minimal marketing investment.
2. 117 active wallets.
3. Distributed rewards to open Beta users monthly, with an average APR of 26%.
4. Validated revenue share and SAFE token models are working.
5. Attracted 3.4k followers on Twitter, and 1k on Discord.

Growing our community

Advertising & Content

1. Videos & tutorials in TikTok/YouTube
2. Collabs with influencers/educators, KOLs in trading
3. Telegram, TikTok, YouTube and Google Ads

Engagement

1. Learn-to-earn educational and engagement model
2. User tournaments

Outreach and Partnerships

1. Referral System
2. Conferences & events
3. CPA lead generation

Our Roadmap

Q3

Emma AI goes live to the public

- Vela Exchange integrations
- Emma AI Smart Contract
- Permissionless SAFE Token
- Concentrated Liquidity Automation
- Looping Automation
- Legal DAO structure

End Q4

Conversational interface goes live

- Mobile APP
- Emma AI Portfolio generation & GPT like chat

Early Q4

DAO Forum goes live

- Arbitrage Automation
- Delta Neutral Automation
- Audits
- Particle wallet (with socials) integration
- Ramp on/off ramp (SEPA, credit, apple & Google pay) integration

2025

Multichain integration

Core Contributors

Filipe L.
Founder

Serial entrepreneur and co-founder of Decentralized Foundation, a web3 revenue-share model protocol on Avalanche with a charitable focus. Over 12 years of team leadership, more than five years in crypto mining and a DeFi investor since 2016.

[Linkedin](#)

Stan Trenev
Lead Dev

Web3 Builder with over eight years of experience and the founder of OxFusion, a prominent web3 studio. His focus is on web3 security, assembling DeFi Money Legos and hunting for smart contract bugs.

[Linkedin](#)

Alexander
Solidity Developer

Passionate DeFi builder. Experience in Smart Contracts, Gas optimizations, Scripts (BOT) and security vulnerabilities.

[Linkedin](#)

Mark Spang
Community & Communication

With experience since 2016 in crypto and community DAOs, specializes in building communities and Twitter growth. Successfully launched projects, significantly increasing visibility and conversion rates in the crypto space.

[Linkedin](#)

Bodgan
ML/AI Lead

Co-Founder and CEO of AlphaCube. Building AI solutions for algorithmic trading. 12 years as quantitative researcher and AI/ML engineer

[Linkedin](#)

Carlos Chop
Front End Developer

Software developer with experience in frontend, backend and mobile applications.

[Linkedin](#)

Talissa Fregona
UI/UX & Branding

Experienced UI/UX designer with a history of optimizing website user experiences for major European companies. Expertise also includes creating visuals for web3 projects, creating and elevating brand awareness, and structuring heavy documentation such as whitepapers
